

## Adaptor pallets

### Solutions For Secure and Efficient Dolly Handling

#### For in-house handling and transport

- Integrated part of the Tray – Dolly System
- Adaptor pallets designed to carry dolly stacks and to meet specific operational requirements in:
  - Palletising of dolly stacks
  - Internal handling
  - Warehousing
  - Transport
- Designs to meet customer specific requirements:
  - Wooden pallet with plastic top sheet
  - Wooden pallet with plywood top sheet
  - Metal pallet with Roll On – Roll Off function
- Suitable for automated material handling systems: 4-way entry for forklift handling
- In warehouse full pallets can be block stacked (1+2) or racked
- Usage of adaptor pallet increases security in transport

#### Excellent stability

- High and secure stability achieved thanks to efficient locking of dollies
- No secondary strapping or stretch film required

#### Packaging line automation

- Suitable for automated handling, palletising and transport on conveyers or by forklift

#### Stacking

- Stackable. Improved utilisation of warehouse and transport space

#### Material

- Durable and high quality material
- Robust construction
