

Dairytainers

For efficient handling and "One Touch Merchandising"

Efficient handling reduce costs

- Used by the retail, dairy and beverage industries
- Less in-store handling, no shelving
- Secure way to distribute goods without damaging the goods
- No wraparounds to be disposed or removed
- Increased efficiency throughout the whole supply chain from the producer to the consumer

Excellent stability

- Steel metal construction ensures good strength for long term mechanical handling in automation process
- 4-way entry for forklift and hand pallet trucks

Space saving

- Better vehicle fill in return logistics
- Improved utilisation of floor space in the warehouse

Optimum display and product availability

- The whole product is visible. The product and its branding get all the attention they deserve
- The product is in focus

Packaging line automation

- Designed to suit automated packaging and conveyor systems
- Washing, handling and sorting of returnable can be automated

Material

- Steel metal frame
- Bright electro-zinc galvanising and dip lacquered
- Maintenance-free low noise wheels
