

Demountable Roll Containers

Designed for effective order-picking and distribution

Save space, time and money

- Reduce space needed in empty storage and return logistics
- Goods are wheeled. No need for forklifts
- Reduces the need for wraparounds
- Reduces damages to the goods transported
- Faster to operate: quicker replenishment than when using pallets

A safe and ergonomic logistic unit

- No need to place roll containers upside down to save space like for rigid containers

Low maintenance costs

- Strong construction
- Easy to dismantle for maintenance, no tools required

Accessories

- Shelf and straps

Stacked sides
