

Metal Dollies

For efficient handling and "One Touch Merchandising"

Efficient handling reduce costs

- Used by the retail, food, dairy and beverage industries
- Increased efficiency throughout the supply chain
- When used as merchandising unit it eliminates the expensive and time consuming work associated with pallet handling and shelving in the shop

Excellent stability

- Steel metal construction with cross bar design allows a low construction height, good strength and holding for long term mechanical handling in automation process
- 4-way entry for forklift and hand pallet trucks
- Can be handled on Adaptor pallet in warehouse

Packaging line automation

- Dolly unit can be palletized automatically in "On Line" or by repacking in "Off Line"
- Customised to suit conveyor systems
- Handling and sorting of dollies can be automated

Nestable

- Easy to stack when not in use
- Improved utilisation of warehouse and transport space

Material

- Steel metal frame
- Bright zinc galvanizing and dip lacquered
- Maintenance-free low noise wheels
