

Nestable roll containers

The Compactainer®

Security Roll container

Designed for effective order-picking and distribution in the retail industry

Save space, time and money

- Saves up to 80% space when nested in returns and when stored
- Easy and fast to operate: nesting Compactainers are at least 4 times faster than assembling demountable roll cages
- Designed for efficient distribution
 - Safe working load: 400kg
 - Loading volume per roll cage ca 1m³

A safe logistic unit

- Good stability – castors located in corners
- Easy to handle in a queue
- Improved ergonomics with rounded corner tube frame
- Does not cause Health & Safety hazards because the point of gravity remains in the centre when folded

Low maintenance costs

- Strong construction made of high tensile profile
- Easy to dismantle for maintenance, no tools required
- Precision ball-bearing wheels

Accessories

- Detachable back/front wall, shelf and straps
